

We are a software company, specialized in providing high quality software applications and complete IT solutions, in various activity sectors: finance, medical, construction and architecture, services.

We made it our mission to make life better

Join our team on the position of: QA TESTER

About Position:

The type of colleague we're looking for:

We value a culture of excellence. We need colleagues who are not only technically proficient, but also demonstrate the following qualities:

- A willingness to embrace the concept of iterative development as the means for building seamless products
- A readiness to give all the effort necessary to do an excellent job even if it means putting in extra time to research the problem you're facing
- Perfectionism knowing how a job should be done and not stopping until it's done correctly

What will your responsibilities look like?

- Test case analysis and design
- Planning of testing activities
- Implement and execute test scripts using automation tools
- Test reporting and tracking of test coverage

What abilities will you need?

- Systems testing (service integration, infrastructure)
- Scalability testing (performance, load, failure)
- Manual testing
- Platform Testing
- Scripting(PHP, Python, Java, Java Script, SQL)
- DB (mySQL)
- Web Testing
- Test Automation (Selenium and other tools)

We are a software company, specialized in providing high quality software applications and complete IT solutions, in various activity sectors: finance, medical, construction and architecture, services.

We made it our mission to make life better

- Regression Testing
- Pen testing
- UNIX is a plus

Do you also have these qualities?

- Excellent organization/time management skills
- Team player
- Strong communication skills dealing with team members and occasionally senior staff
- Detail-oriented
- Strong desire to learn and grow professionally
- Product Mindset

What experience do you need?

- Minimum of 2 years of software testing in web technologies with an appreciation of programming, ideally with experience of more than one technique, platform or tool
- Experience with all phases of SDLC (Software Development Lifecycle)
- Experience with Agile methodologies and frameworks
- Experience of testing Web and Mobile applications
- Experience of exploratory testing
- Experience of investigating defects or issues through various means such as monitoring logs

Curious about what we offer?

- Working on products not on outsourcing projects
- Working in a very dynamic company
- Competitive salary
- Flexible working hours
- Opportunity to establish valuable career contacts
- Complex package of benefits
