

We are a technology company listed on the Bucharest Stock Exchange and specialized in digital transformation of businesses and communities.

We integrate the skills needed to provide access to the digital economy. Team agility and human-friendly solutions are the ingredients for transforming ITC complexity into simplicity for our partners.

We made it our mission to make life simpler

Join our team on the position of:

## SENIOR QA AUTOMATION ENGINEER

### The Type of Colleague We're Looking For

We are looking for team players who are not only technically proficient, but also demonstrate the following qualities:

1. **Continuous development:** to embrace the concept of learning and becoming better day by day. Personal achievements give us energy and inspire our growth together.
2. **Responsibility:** to get involved courageously and to be the one who presses the start button whenever you see an opportunity.
3. **Agility:** being able to look into the future and search for the solution that will take us further.

What will your responsibilities look like?

- Create and maintain the automation testing framework
- Implement and execute test scripts using automation tools
- Test reporting and tracking of test coverage
- Identifying software application weaknesses and target areas
- Sketching out ideas for automated software test procedures
- Reviewing software bug reports and highlighting problem areas
- Writing automation scripts and implementing software applications
- Troubleshooting automation software and finalizing system procedures
- Identifying quality issues and creating test reports
- Collaborating with the design team to solve application faults
- Offer mentorship to junior and mid level qa engineers towards learning automation testing and its perks

### We made it our mission to make life simpler

#### What abilities will you need?

- Exposure to working with the Agile Methodology and its core principles (especially around testing)
- Ability to produce top quality documentation and to communicate effectively in writing anything from ideas, strategies, to clear and concise defect reports
- Understanding of automation concepts
- A good, solid understanding of test automation principles
- Experience of using tools such as Selenium Webdriver, IntelliJ, Maven, phpUnit
- Thorough understanding of strategies regarding but not limited to: ATDD, BDD, TDD
- Systems testing (service integration, infrastructure)
- Scalability testing (performance, load, failure)
- UNIX (medium)
- Scripting (Java, Java Script, PHP, Python)
- DB (mySQL)
- Web Testing

#### Curious about what we offer?

- Working on products, not on outsourcing projects
- Working in a very dynamic company
- Competitive salary
- Flexible working hours and work from home days
- Opportunity to establish valuable career contacts
- A complex package of benefits

#### Send your CV to [work@lifeishard.ro](mailto:work@lifeishard.ro)
