

We are a technology company listed on the Bucharest Stock Exchange and specialized in digital transformation of businesses and communities.

We integrate the skills needed to provide access to the digital economy. Team agility and human-friendly solutions are the ingredients for transforming ITC complexity into simplicity for our partners.

We made it our mission to make life better

Join our team on the position of:

## SENIOR LARAVEL DEVELOPER

### The Type of Colleague We're Looking For

We are looking for team players who are not only technically proficient, but also demonstrate the following qualities:

1. **Continuous development:** to embrace the concept of learning and becoming better day by day. Personal achievements give us energy and inspire our growth together.
2. **Responsibility:** to get involved courageously and to be the one who presses the start button whenever you see an opportunity.
3. **Agility:** being able to look into the future and search for the solution that will take us further.

What will your responsibilities look like?

- Contribute to product development with ideas and technical solutions;
- Optimize and refactor existing code to improve performance and reliability;
- Develop new features following a structured approach and thinking about extensibility;
- Suggest improvements, security needs, best practices etc. (your voice will be heard);
- Focus on continuously improving our processes and practices;
- Software Architecture Design.

## What abilities will you need?

### Ownership and autonomy are critical in this role to be successful.

- Strong experience with PHP and Laravel;
- Strong understanding of API design principles and best practices;
- Experience in designing and implementing database schemas and optimizing database performance;
- Understanding of performance optimization technique, including caching strategies, query optimization, and load balancing;
- Familiarity with message-driven architecture using RabbitMQ, Apache Kafka, or similar message brokers;
- Ability to write unit and integration tests using PHPUnit;
- Understanding of the principles of SOLID and DRY in software development;
- Contribute to the overall architecture design, and help drive technical decisions;
- Familiarity with Docker containers and containerization for the local development environment is a plus;

## Do you also have these qualities?

- Ability to mentor and guide junior developers in software development practices, including code reviews and pair programming;
- Strong problem-solving and analytical skills to identify and resolve complex software issues;
- Detail-oriented;
- Excellent organization/time management skills;
- Care for your team, communicate with empathy;
- Desire to continuously learn and grow professionally.
